Date: February 10, 2012

Two Harbors Investment Corp.

Fourth Quarter 2011

Investor Presentation

Safe Harbor Statement

Forward-Looking Statements

This presentation includes “forward-looking statements” within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. Actual results may differ from expectations, estimates and projections and, consequently, readers should not rely on these forward-looking statements as predictions of future events. Words such as “expect,” “target,” “assume,” “estimate,” “project,” “budget,” “forecast,” “anticipate,” “intend,” “plan,” “may,” “will,” “could,” “should,” “believe,” “predicts,” “potential,” “continue,” and similar expressions are intended to identify such forward-looking statements. These forward-looking statements involve significant risks and uncertainties that could cause actual results to differ materially from expected results. Factors that could cause actual results to differ include, but are not limited to, higher than expected operating costs, changes in prepayment speeds of mortgages underlying our RMBS, the rates of default or decreased recovery on the mortgages underlying our non-Agency securities, failure to recover certain losses that are expected to be temporary, changes in interest rates or the availability of financing, the impact of new legislation or regulatory changes on our operations, the impact of any deficiencies in the servicing or foreclosure practices of third parties and related delays in the foreclosure process, the inability to acquire mortgage loans or securitize the mortgage loans we acquire, the inability to acquire single family residential properties at attractive prices or lease such properties on a profitable basis, the impact of new or modified government mortgage refinance or principal reduction programs, and unanticipated changes in overall market and economic conditions.

Readers are cautioned not to place undue reliance upon any forward-looking statements, which speak only as of the date made. Two Harbors does not undertake or accept any obligation to release publicly any updates or revisions to any forward-looking statement to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based. Additional information concerning these and other risk factors is contained in Two Harbors’ most recent filings with the Securities and Exchange Commission. All subsequent written and oral forward looking statements concerning Two Harbors or matters attributable to Two Harbors or any person acting on its behalf are expressly qualified in their entirety by the cautionary statements above.

Two Harbors is Well-Positioned

NYSE-listed hybrid mortgage REIT investing in residential mortgage and housing sectors

- Total shareholder return since inception of 43%¹
- Thirteen-fold increase in portfolio since inception to \$6.4 billion
- Security selection and credit analysis driven by experienced team and proprietary systems
- Strong focus on hedging and book value stability
- Targeted diversification of business model through asset securitization and single family residential properties

(1) Total shareholder return calculated for the period October 29, 2009 through February 8, 2012. Total shareholder return is defined as capital gains on stock price including dividends. Source: Bloomberg as of February 8, 2012.

Supply and Opportunity

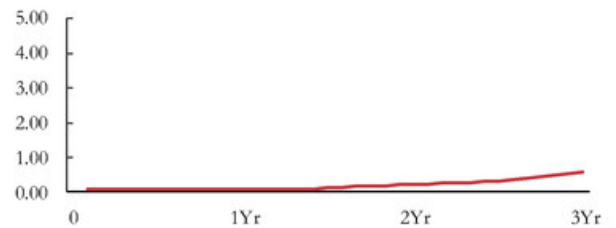

Macro Trends

- Continued “supply” will likely keep Agency spreads attractive.
 - Fannie Mae and Freddie Mac are mandated to shrink their portfolios by at least 10% per year.
- Attractive loss-adjusted yields in the non-Agency sector.
- Current interest rate environment is attractive for the mortgage REIT model.
 - The Fed has stated that they anticipate keeping the target federal funds rate low until late 2014.
 - The yield curve remains steep compared to historic averages.

Projected GSE Portfolio Run-off

Fed Funds Rate Expectations

TWO's Competitive Advantages Drive Returns

Core Strengths

- **Capture Benefits of Hybrid Model:** We seek out opportunities in Agency and non-Agency RMBS and believe this diversification allows us to better mitigate risks, including volatility in interest rates, prepayments, and credit risk.
- **Opportunistic:** We deploy capital to opportunities we believe are the best value in the residential mortgage market.
- **Disciplined Asset Selection:** We extensively analyze loans underlying the RMBS, including loan size, property type, maturity, prepayment characteristics and borrower credit profiles.
- **Hedging:** We utilize sophisticated hedging strategies to manage risk.

2011 Total Shareholder Return¹

Total Shareholder Return Since Inception²

Note: "TWO" means Two Harbors Investment Corp.

(1) Source: Bloomberg. "PRMRITR" is the Pine River Mortgage REIT Index Total Return (PRMRITR: IND).

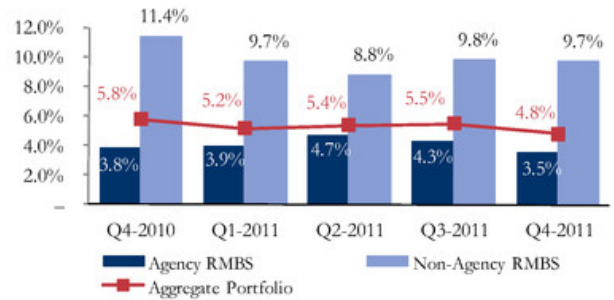

(2) Total shareholder return calculated for the period October 29, 2009 through February 8, 2012. Total shareholder return is defined as capital gains on stock price including dividends. "Hybrid mREITs" represent the average total shareholder return of CIM, IVR and MFA. "SPXT" represents S&P 500 Total Return Index (SPXT: IND). Source: Bloomberg as of February 8, 2012, company websites and TWO's estimates.

Fluid Asset Allocation Drives Performance

Opportunistic Capital Allocation¹

Annualized Yields by Portfolio³

Dividends²

Net Interest Spread⁴

Three Months Ended	December 31, 2011			September 30, 2011		
	Agency	Non-Agency	Aggregate Portfolio	Agency	Non-Agency	Aggregate Portfolio
Annualized Yield	3.5%	9.7%	4.8%	4.3%	9.8%	5.5%
Cost of repurchase agreements	(0.4%)	(2.2%)	(0.6%)	(0.3%)	(2.1%)	(0.6%)
Cost of interest rate swaps	(0.5%)	-	(0.4%)	(0.8%)	-	(0.7%)
Cost of financing	(0.9%)	(2.2%)	(1.0%)	(1.1%)	(2.1%)	(1.3%)
Net interest spread	2.6%	7.5%	3.8%	3.2%	7.7%	4.2%

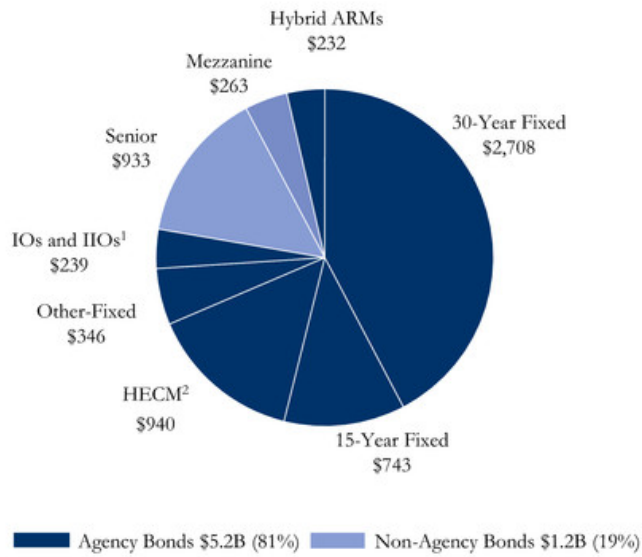

- (1) ABX index represents ABX 06-2 AAA.
- (2) 2011 dividends may not be indicative of future dividend distributions. The company ultimately distributes dividends based on its taxable income per common share, not GAAP earnings. The annualized dividend yield on the company's common stock is calculated based on the closing price of the last trading day of the quarter.
- (3) Respective yields include inverse interest-only securities ("IOs" or "Agency Derivatives").
- (4) Net interest spread includes Agency Derivatives, cost of financing RMBS and swap interest rate spread.

Investment Portfolio

As of December 31, 2011

\$6.4B RMBS Portfolio
(\$ in millions)

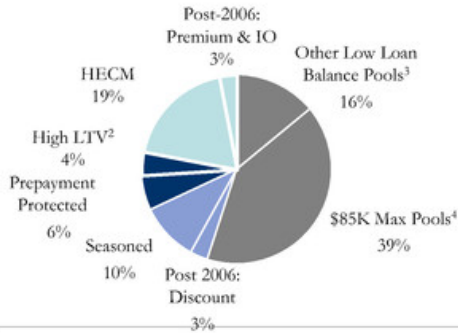

(1) Includes interest-only securities ("IOs") and IIOs of \$155 million as of December 31, 2011.
 (2) Home Equity Conversion Mortgage loans (or "HECM") are loans that allow the homeowner to convert home equity into cash collateralized by the value of their home.

Security Selection is Paramount

Portfolio Composition¹

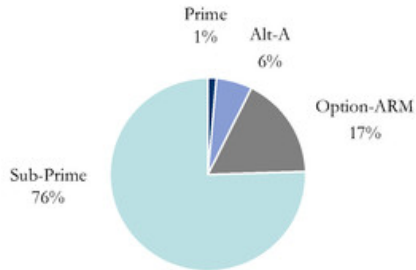

Q4-2011 Agency Portfolio

Agency Strategy

- Attractive returns with moderate leverage
- Intense focus on prepayment stability aims to provide for sustainable yields
- Stable cash flows make interest rate hedging more effective
- Portfolio's prepayment protection of 97%

Q4-2011 Non-Agency Portfolio

Non-Agency Strategy

- Attractive loss-adjusted yields
- Weighted average cost basis of \$55.74
- Improving underlying loan performance: Declining delinquencies, relatively stable housing prices and servicers' actions benefiting bond holders
- Potential benefit from policy actions
- Minimizes downside credit risk, but retains upside optionality

(1) All figures and data on this slide are as of December 31, 2011.
 (2) Securities collateralized by loans with greater than or equal to 80% loan-to-value ratio.
 (3) Securities collateralized by loans of less than or equal to \$175K, but more than \$85K.
 (4) Securities collateralized by loans of less than or equal to \$85K.

Sophisticated Risk Management Approach

Hedging

- Portfolio reflects low interest rate exposure
- Swaps/swaptions complement IO strategy
- Optional protection still in place – reduced premium at risk

Funding and Liquidity

- Long-dated repos and non-Agency facility provide stability
- Maturities over 90 days represented 23% of total RMBS borrowings
- Systematic monitoring of daily liquidity
- Diversification with 20 repo counterparties
- Interest rate swap – U.S. Treasuries position

Swaptions Profile

- Swaptions payoff profile allows us to benefit if rates fall, but have protection if rates rise
- Profile provides for gain potential, but loss is limited to cost of purchasing the swaption and the future loss is limited to the premium at risk

Credit Risk

- Highly detailed loan level analysis
- Stress test to different housing scenarios
- Credit hedges utilized on a limited basis

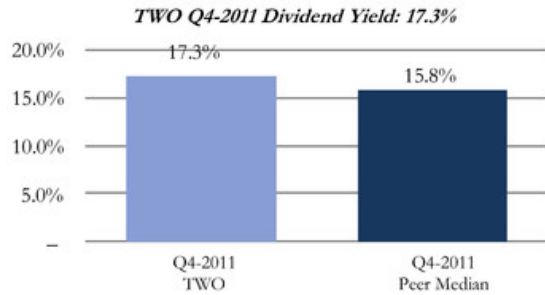

Notes: All data on this slide are as of December 31, 2011.

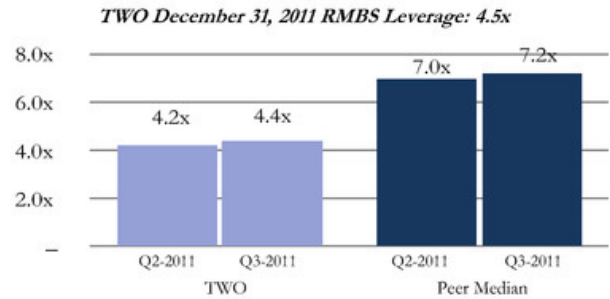

Attractive Returns With Lower Risk

Superior asset selection and risk management drive returns while taking on less risk.

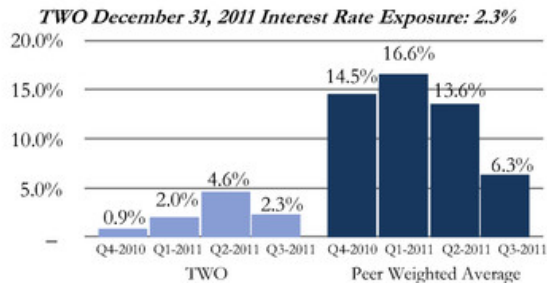

Attractive & Comparable Dividend Yield¹...

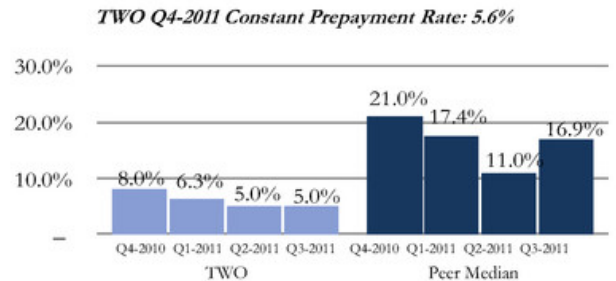

... With Lower Leverage²...

... Less Interest Rate Exposure³...

... And Less Prepayment Risk⁴

Note: All peer financial data on this slide based on available September 30, 2011 financial information as filed with the SEC. Peers include AGNC, ANH, CIM, CMO, CYS, HTS, IVR, MFA and NLY.
 (1) Reported fourth quarter 2011 dividend annualized, divided by closing share price as of December 31, 2011. Peer dividend data based on company press releases.
 (2) Debt-to-equity defined as total borrowings to fund RMBS securities and Agency derivatives divided by total equity.
 (3) Represents estimated percentage change in equity value for +100bps change in interest rates. Change in equity value is asset change adjusted for leverage. Data not available for CYS and CMO.
 (4) Represents the constant prepayment rate, or CPR, on the Agency RMBS portfolios. Data not available for CIM prior to the first quarter of 2011.

Other-Fixed	313,555	346,387	6.7%	333,390	5.0%	52
IOs and IIOs	2,231,358	239,498 ⁽¹⁾	4.6%	259,027	5.3%	67
Total¹	\$ 6,823,839	\$ 5,208,396	100.0%	\$ 5,121,631	4.6%	26

(1) Market value of IOs of \$84 million and Agency Derivatives of \$155 million as of December 31, 2011.

Non-Agency Securities as of December 31, 2011

	Senior Bonds	Mezzanine Bonds	Total P&I Bonds
Portfolio Characteristics			
Carrying Value (\$K)	\$932,867	\$262,633	\$1,195,500
% of Non-Agency Portfolio	78.0%	22.0%	100.0%
Average Purchase Price	\$55.05	\$58.19	\$55.74
Average Coupon	2.3%	1.3%	2.0%
Collateral Attributes			
Average Loan Age (months)	65	83	69
Average Original Loan-to-Value	78.0%	77.4%	77.9%
Avg. Original FICO ¹	649	639	647
Current Performance			
60+ day Delinquencies	44.2%	35.2%	42.2%
Average Credit Enhancement ²	21.9%	31.7%	24.1%
3-Month CPR ³	2.1%	3.3%	2.4%

- (1) FICO represents a mortgage industry accepted credit score of a borrower, which was developed by Fair Isaac Corporation.
 (2) Average credit enhancement remaining on our non-Agency RMBS portfolio, which is the average amount of protection available to absorb future credit losses due to defaults on the underlying collateral.
 (3) 3-Month CPR is reflective of the prepayment speed on the underlying securitization; however, it does not necessarily indicate the proceeds received on our investment tranche. Proceeds received for each security are dependent on the position of the individual security within the structure of each deal.

Non-Agency Discount Bond Example

Represents actual bond held in Two Harbors' portfolio as of the filing date of this presentation. Collateral summary and yield analysis scenarios represent the views of Two Harbors and its external manager, PRCM Advisers LLC, and are provided for illustration purposes only and may not represent all assumptions used.

(1) "WAL" is defined as weighted average life.

(2) "Clean" is defined as a borrower who has never missed a payment. "Almost Clean" is defined as a borrower who is current and has never been delinquent more than three times for a period greater than 30 days or delinquent one time for a period greater than 60 days.

(3) MTM LTV stands for mark-to-market loan-to-value.

(4) 12mo LIQ represents mark-to-market loan-to-value of loans liquidated in the last twelve months.

(5) Base case model assumes a 10% decline in housing prices for the first 12 months, then increases of 2% per year for the remaining life of the bond.

Two Harbors Team with Deep Securities Experience

Investment Team

Co-Chief Investment Officers

Steven Kuhn

- Also serves as Partner - Head of Fixed Income Trading of Pine River
- Goldman Sachs Portfolio Manager from 2002 to 2007; 20 years investing in and trading mortgage backed securities and other fixed income securities for firms including Citadel and Cargill
